brianriazzi87@gmail.com

Leveraging over 12 years of experience in desktop, mobile and mobile app development, which helps me create powerful and intelligent solutions. My experience with JavaScript frameworks like React and Vue, design systems, API contracts, leadership, cross functional communication, and full stack development allow me to quickly adapt and create engaging experiences

Work History

Mobile Application Developer

Skyview1, Columbus, OH

July 2023 - Current

- Cultivated app design system to streamline application production.
- Created and managed the CI/CD pipeline for deploying the mobile app to the App Store/Play Store.
- Tracked post-deployment bug reports to recognize and resolve trends among user-reported faults and complaints.
- Implemented E2E testing using Maestro to provide code confidence for all deployments.
- Built a desktop CMS for managing the app's customers and clients.
- Maintained SOC2 Compliance for both the app and website.
- Managed a team of 3 frontend developers.

Senior Software Engineer

Insight Digital Innovation,
Columbus, USA

January 2021 - July
2023

- Managed the architecture of the Vue2 / Vue3 application and led the refactoring effort to transition the project from Vue 2 to Vue 3.
- Created full stack graphing and charting solution for Purell that tracks employee hand hygiene and washing percentages.
- Implemented analytics solution to track user engagement and problem points to help drive design decisions.
- Created APIs using C# to gather and return data for the Frontend application to ingest.
- Managed design system and implemented best practices for the modernization of the Frontend application.
- Led four design sessions to solicit feedback from users, provide a demo of upcoming features, and improve user engagement.
